Sokhoeurn has gotten 9 members in a big and poor family. She is a youngest child in the family. Her parents are farmers but unfortunately, her mother has been sick many years ago because of the high blood pressure's disease. They have owned two hectare of farmland. For yearly, they have gathered from 40 sacks to 50 sacks of rice's output. For amount of 50 sacks of rice, they have sold out for 20 sacks and got \$187.5 from traders.

Although, they could earn some incomes from selling rice but those incomes couldn't settle the family well, therefore, they have had to grow some yam and cassava at the farm in order to serve for family's needs, said by Sokhoeurn. However, the amount of that revenue still wasn't adequate to buy food, clothes and school supplies for Sokhoeurn's schooling.
