

Girl's Name:

Sponsor's Name:

Sam Theory is a 13 years old student in 5<sup>th</sup> grade at **The Shintoshin Rotary and Speros (Hawaii) School**, which is located in Pal Hal village, Rik Reay commune, Rovieng district, and Preah Vihear province.

Theory has gotten six members in the family. She is a fourth born in the family. Her parents are farmers. They have owned one hectare and half of farmland for transplanting rice. For yearly they could collect two tons of rice and they have sold out for one ton and half for about \$280.25 to pay for other debts.

And for leftover half ton of rice they have served for daily consumption. Howsoever that amount of income was unable to hold on their family's needs. Therefore, they have had to plant yam and cassava and waited until three months to six months then they could gather the crops for selling. For one kilogram of yam and cassava was about \$0.0875. Although, they have tried to expend their crops for selling but the result still was insufficient to cover their needs either.

Whereas Theory, she was always absent from school because her parents needed her to take care of the crops at the farm.
