

Girl's profile name: Searn Sreyroth

Sreyroth is 15 years old, student in Grade 5 at The Janie's School #524 donated by Jenifer Begg. It's located in Snam Preah commune, Bakan district, Pursat province.

There are four members in her family. She has one sister and a brother. She is an oldest sister. Her father has two wives. Now he lives away from her. Her parents were living and working in Thailand. Her father was working as a farmer at the coconut farmland. And her mother was working as a cook at that place too. Their monthly income is very low; they sent a little bit of money to support their children in studying. Now she was living with her old grandmother. Her family doesn't have any land for growing rice. So for her daily meals, she depends on buying rice from the market, growing some food plants and finding grabs; fishes; shells in the ponds or lake around her village.

As an oldest sister of the family, Sreyroth must do all kinds of work to take care her brother and sister. At night, she usually spends time to teach them in reading and writing Khmer alphabets. At school, she isn't an outstanding student of Khmer or English, but these two subjects are her favorites. She rarely misses or absent in English and computer class. She was studying hard with them everyday.

In the future, she wants to be a teacher at a primary school because it's her love subject. She wants her brothers, sisters and other children in the village who were living near her house know how to read and write Khmer fluently.
